

ABRALON® & SUPER PADS FOAM BACKED DISCS

ABRALON® POLISHING FOAM DISCS

ABRALON® Micro Fine H&L Polishing Foam Hook & Loop Discs are made from silicon carbide mesh laminated to 1/4" thick foam. Open cell foam is suitable for dust extraction. They are used wet or dry to achieve a mirror polish on automotive finishes or solid surface (CORIAN® type) countertops. It is the industry standard for polishing bowling balls. 6" diameter attaches to 5" or 6" hook & loop sanders. For a satin finish, stop at 1000 grit. For a mirror shine, continue with 2000 and 4000 grits. You may combine grits for quantity discounts. Also see ABRANET™ discs on page 13.

FOAM / HOOK & LOOP BACKED "SUPER PADS"

New product from Germany — "SUPER PADS" are available in Aluminum Oxide (great for sanding wood bowls on a lathe), Silicon Carbide (solid surface, bowling balls, auto), and Diamond (stone, metal). Silicone Carbide & Diamond pads can be used wet or dry. All "Super Pads" have an open cell foam suitable for dust extraction. The SC discs are similar to Mirka "Abralon" but have a thinner 1/8" foam backing and are priced lower. We stock 3" and 6" diameters. Other grits and sizes (4", 5", 8", 9", 11") available on request. You can mix grits to meet total quantity.
